High Power Bluetooth 5.0 Audio Transmitter & Receiver

Operates both as a transmitter and receiver, allowing you to send music from your phone for playback through an amplifier or powered speakers or to transmit audio from a non-bluetooth device to Bluetooth headphones or amplifier/receiver. Its perfect for transmitting the audio output from your TV to headphones! Two units may also be set up to relay audio wirelessly over extended distances. To do this one A1107A can be set up as a bluetooth receiver and the other as a transmitter.

Features • Bluetooth 5.0 • Transmit or receive modes • Range up to 80m • In-built 1000mAh lithium battery for 15hrs of streaming • Device bypass mode • Stream simultaneously to 2 headphones at once • aptX-HD low latency transmission with high fidelity lossless audio • NFC fast pairing function • S/PDIF optical input or output connection • 3.5mm aux input jack • Includes 3.5mm to RCA stereo cable, 3.5mm to 3.5mm stereo cable, optical cable and USB charging cable

Hands Free Bluetooth Car Kit

Make hands-free calls and play music directly through your car speakers via FM radio. Simply pair with your phone using Bluetooth and connect to your car stereo using FM transmission, instantly! Tune an unused FM frequency (87.5-108MHz) on your car stereo & match it to the unit. It will even mute the music when a call comes in. Call audio is routed through your car speakers and a built in mic picks up your voice. Handy button allows interaction with siri or google assistant when needed. Also features the following USB ports; 1x USB Type A QC3.0, 1x USB Type C PD3.0 and a USB port ideal for playing music.
