Redback® 2 x 50 Watt Bluetooth Amplifier

This compact stereo class-D amplifier features Bluetooth 4.2 streaming with in-built optical input for digital audio sources. The amplifier is also fitted with 3.5mm stereo jack and stereo RCA inputs for connection to external audio sources. Bluetooth takes priority over all other inputs, providing easy wireless streaming when you need it. The 2 x 50W RMS output is ideal for small retail environments. It is perfectly paired with the A 4861 subwoofer amplifier - see below. Size: 200W x 48H x 220Dmm.

Features • Class-D 2 x 50W amplifier • Bluetooth 4.2 wireless streaming • Stereo RCA & 3.5mm jack inputs • Optical input with high performance DAC • Automatic signal switching with priority for Bluetooth audio source • 240V AC operation

4 Input 4 Zone 30W Stereo Amplifier

This integrated 4 zone Class-D amplifier and source switcher is designed to power up to 8 speakers and switch between four audio sources. Connection of sources is via 6.35mm jack (microphone), 3.5mm stereo jack, stereo RCA and S/PDIF digital (co-axial or optical). It's ideal for small businesses looking to provide background music, announcing etc using ceiling or wall speakers. Toslink audio connection is ideal for television audio. A local loop output and headphone jack connection is also provided. Each zone is fitted with its own level control to make adjustments in each area. Dimensions: 285W x 128D x 43Hmm. **Please note: 9A power supply is included**

4 Zone 30W Stereo Amplifier

Excellent for multi-room audio distribution, this 12V powered four zone Class-D amplifier produces 30W RMS per zone (15W RMS per channel) - all from a case just 200mm across! One input source may be connected on the front panel via stereo RCA sockets. An individual volume control is provided for each zone. Pluggable terminal blocks make output connection to speakers easy. A 3.5mm stereo headphone jack is provided with a dedicated volume control. Loop output allows connection of source input to additional amplifiers. Includes speaker protection circuitry. A quick and easy way to distribute an audio source, such as background music, around a home or business. Dimensions: 205W x 108D x 26Hmm. **Please note: 9A power supply is included**
