

GF-3B

3-Module Back Box

The GF-3B is a 3-module back box that recesses into the wall. It is used for mounting three GT Series entrance station modules and cover panels into a 1x3 layout.

Conduit piping is included to connect it to another back box for a 2x3 layout. Connect to two back boxes for a 3x3 layout.

- Includes space inside for wiring
- Conduit knockouts on all sides

Material ABS plastic
