Portable Cable Reeler Stand

A light weight and easy to carry accessory for the installer on the move! This steel frame cable reeler stores cable reels up to 400Ø x 430Wmm and folds up instantly when picked up to move quickly to a different location. It's backward leaning design means that the weight of the cable reel keeps it stable when pulling cable through conduits and ceiling spaces. Maximum cable reel weight 25kg.

Cable for illustration purposes.

Polyester Coated Cable Running 'Snake'

An innovative lightweight device designed to make running cables in conduits, above false ceilings, inside walls and under floors an absolute breeze! The 6mm flexible polyester coated coil will not kink (even in tight corners), and is easily retracted when required. Supplied coiled in a convenient dispenser with brass ring ends for cable connection.

Cable Push / Pull Rods (10 x 1m)

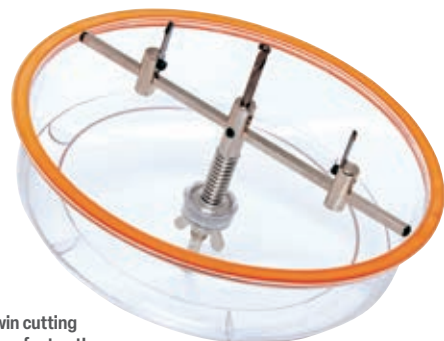

Supplied in ten 1m lengths, these flexible rods may be screwed together to form a single 10m length. Typically used when running cable across suspended tile ceilings. Allows you to push or pull cables without getting into the ceiling/crawl space. Fitted with brass loop one end for connection to cable. Constructed from hard wearing fibreglass material. Supplied in a tube for easy transport.

Includes: 10 x 1m Rods, 1 x Keyring End, 1 x 'U' Hook, 1 x Flexible Loop.

▼ Hole Saws

Adjustable Hole Saw 40mm - 300mm

Features twin cutting blades for a perfect cut!

This adjustable cutting tool features impact resistant transparent cowl for simple operation. The cowl ensures that waste during operation is captured while the spring loaded cutting arm prevents movement for added safety. Cutting depth up to 25mm by a single cut or alternatively 50mm is possible by drilling both sides. Perfect for cutting holes in plasterboard, plywood, acrylic sheet, etc. (Not suitable for metal). Suits both battery and electric drills with a standard 3/8" (10mm) chuck.
