Iroda® Maxi “Pro-Torch” Head

The Maxi “Pro-Torch” is the highest output blow torch available in the Altronics range. It utilises high capacity 220g butane canisters to provide a powerful wind resistant flame. An adjustable regulator provides the flexibility to choose a gentle orange flame or 1350°C blue jet. Ideal for brazing, soldering, plumbing, industrial maintenance, heatshrinking & model making. A click of the “one-touch” piezo ignition provides quick startup every time. T 2455 Gasmate® 4 pack of gas to suit.

Note: these gas canisters are not compatible with any other Iroda® gas product.

Features • One-click piezo ignition • Rotary gas volume adjustment • Wind resistant flame • Hand protection plate • Utilises standard butane canisters with mounting plate • Robust construction for every day professional use.

Gas canister sold separately.

T 2455 Pk 4 butane gas canisters	11.50		

Don't forget the gas!**Iroda® Butane Gas Refill**

Aerosol can of high quality butane suitable for gas powered soldering irons. 250ml net.

We recommend the use of high quality Iroda® butane gas for use in all Iroda® gas powered products. Inferior or lower grade butane may contain a higher level of impurities which will block the internal microscopic filters faster causing intermittent or complete failure.

Must travel by road, regulations prohibit transport by air freight.
